## Progent/Clinic V10.5 New Digital Management Features!

First of all, we would like to thank all our clients for their invaluable cooperation in adopting the technology required to migrate toward the RAMQ's new SYRA platform. Progent successfully completed this important migration last March.

Progent will present the most recent improvements made to its version 10.5 of Progent/Clinic during the Journées dentaires internationales du Québec (JDIQ). This version includes key advances in "paperless file management" (EMR), which improves your team's productivity.

Here are some of the new features of version 10.5:

- Automatic dialing is now possible simply by clicking on an icon that appears to the right of the telephone number.

Office 1	Cell 1
(514)327-7766	1(613)367-2983
(418)346-7485	
(819)349-6388	

- A new "Kanban"-type patient tracking board keeps you informed of the office's status at all times by indicating when patients are present in various rooms. This is an addition to the "Agenda" module.

This patient tracking board uses the same visual indicators as the agenda, such as a blinking light in one room to let the dentist know that the patient is waiting for them in another room once scaling and hygiene measures are finished.

(in French)

- The visual indicator in the agenda (blinking, sound notification) has been enhanced and can now issue a notification several hours before the appointment begins: For example, it is now possible for an appointment to blink in a specific colour 24 hours before it begins.
- An information display and print configurator is now included in the agenda. The latter lets you choose from over 220 different pieces of information from the patient record and the appointment sheet to decide what you would like to see and print in the agenda.

Patient	Pr.	Per.	Cat.	r.-v.	Ressource	Heure	Date	Sel

001807	00	6	DO	JFL		10:00		<input type="checkbox"/>

- The "waiting list" has been entirely reviewed. A list of potential patients appears after a cancellation or rescheduling of an appointment. A gradation of colour lets you quickly identify the patients who could potentially fill the open time slot.
- Documentation support in the Electronic Patient Record (EPR) has been greatly enhanced thanks to two key improvements:
  - The ergonomics of the automated annotation assistant has been reviewed so that it is easier to use and much more flexible, given the variability of treatment contexts. In this new version, you can also create personalized models for additional general notes per professional.
  - A new "professional notes in the record" option lets you consult all operative documentation entered in the file. This is the equivalent of the "paper" operation record. This new function also simplifies the signing and approval of the professional and hygienist.

► The report generator has a brand-new preview interface. Simpler and much more interactive, everything happens on just one screen. Quickly save your report in PDF or MS Excel®, send it by email and interactively convert displayed data into a graph.

(in French)

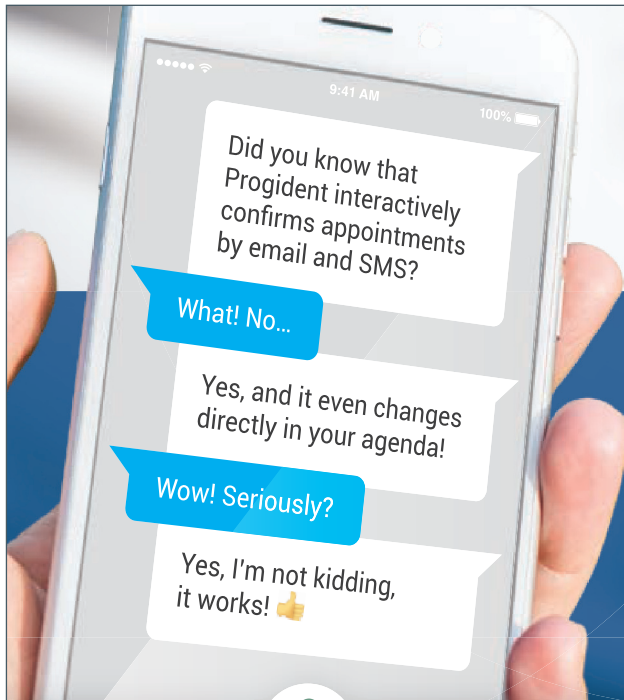

**A reminder concerning automated appointment confirmation**

We would like take this opportunity to remind you that the Progident solution has supported automated confirmation of appointments by email and text message since its version 9.

Thanks to this function, as soon as a patient confirms an appointment through an email or text message sent using Progident/Clinic, your agenda is automatically updated. The appointment status is then changed to "appointment confirmed" so that your staff can concentrate on the unconfirmed appointments.

This saves your administrative staff time and encourages your clients to show up for their appointments. Take advantage of it!

Come meet us at the ACDQ's stand during the upcoming JDIQ. Progident: **1 800 650-0143** or **progident.com**

# SAVE TIME

thanks to Progident's interactive confirmation of appointments by email and SMS!

**AND THAT'S NOT ALL WITH PROGIDENT:  
AS A BONUS, TREAT YOURSELF TO THE BEST  
IN TERMS OF COMPUTERIZED MANAGEMENT**

- . Paperless file management (EMR)
- . Support of RAMQ's SYRA platform
- . Patient Web portal
- . Intelligent waiting list
- . Auto dialing of phone numbers
- . Patient tracking board
- . Integrated accounting management
- . And much more...
