An Innovative and Flexible Application Platform

That is the difference and why Progident software distances itself from the competition.

A fully updated software for the Windows 10™ operating system of Microsoft™.

A customized report generator and a screen configurator let you adapt the software to your specific needs and save up to 9 preferred work environments per user.

Finally, a software that adapts to your practices and not the other way around!

Accurate Statistics on Your Practice

Several management and performance indicators (dashboards) are visual. For example, the average daily hourly rate or the number of missed, cancelled or moved appointments of a patient.

To these indicators are added **more than 240 management reports** that ensure you can analyze your clinic from all angles!

Simple, Visual, and Efficient Billing

All dental fee guides are included in the software.

The encoding of procedures can be done using the dental chart or the treatment file via a powerful input wizard that operates on the abbreviation basis.

The software supports the ACDQ™ and ITrans™ networks for claims to primary insurers. The new SYRA™ platform of the RAMQ™ is also entirely supported.

You will be more productive by saving valuable time thanks to the automated reconciliation features of RAMQ™ payments and Dentaide™ payments. Progident is the only software to offer the Dentaide™ reconciliation!
5 Simple Reasons to Choose Progident

1 The best-selling dental management software in Quebec. More than 35% of Quebec dental practices use Progident, which is about 1,700 dentists in Quebec!

2 Technologies that rigorously meet the criteria of "Paperless" file.

3 A range of Web services available directly from the software: Frequently asked questions (FAQ), support request, Web conferencing, video tutorials, etc.

4 An incomparable "Cost/Benefit" ratio on the market.

5 Specialists in the dental profession for more than 25 years. A professional company whose durability and expertise are guaranteed.

PROGIDENT

The Computerized Solution
That Covers All Essentials Aspects
of Your Digital Management!

PROPEL YOUR MANAGEMENT IN THE WEB ERA!

GO BEYOND THE BASICS

THE BEST-SELLING DENTAL MANAGEMENT SOLUTION IN QUEBEC!

A Safe "Paperless" Dental File (EMD)

Cut back on the amount of paper your clinic uses! Every digital document (dental imaging, form, video, audio, etc.) is centralized and conserved in each patient file.

The digital environment respects the highest standards of confidentiality and traceability.

The software includes a set of standard dental forms, including the medical history approved by the ACDQ™ and the ODQ™. Many of these forms can be interactively signed by the patient.

Patient Web Portal

Integrate a "Patient" section to your website and allow your patients to consult their appointments and follow-ups whenever they want, in a secure environment.

Share additional background documentation or personal documents with them that they can download if needed. For example, their tax receipts.

An Appointment on Time

Confirm your appointments by SMS or emails and save time, it's guaranteed! Your agenda will automatically be updated when the patient's answer is received.

Enjoy visual indicators and the Kanban console to track the progress of your patients and get a global overview of your clinic in real-time.

Take advantage of the multi-branch management to centralize the management of your appointments in one place.

Consult your professional agenda any time from your mobile phone by using the "Google Calendar" synchronization.

A Complete Dental Chart

The software supports your process from start to finish: initial examination, including the PSR and periodontal measurements, diagnosis, treatment plan, visit planning, treatments, and operative documentation.

You can also give a business proposal to your patient instantly that he can sign electronically to give his informed consent. The documentation of your operative notes is simplified ("Drag and Drop") with the integrated wizard that relies on a bank of standard texts that you can customize.

Benefit from a true evolutive odontogram by selecting the visit date of the initial examination to view the complete documentation of each stage of your clinical intervention.

Effective and Productive Communication

Use the integrated messaging system to communicate quickly between all your rooms. A patient has arrived; his appointment can flash in the treatment room and an audible alarm can be emitted.

Use the self-dialling feature to speed up communication with your patients.

Reconcile any complementary follow-up (laboratory, receivable, etc.) to the files thanks to the management of complete and centralized interventions with the patient file (PRM).

Take advantage of an effective tool for all your needs of occasional or batch communication: birthdays, holiday season, clinic closures, customer follow-ups, etc.

A Complete Accounting with Integrated Payroll

Our Progident/Clinic software is entirely integrated with our accounting software, Progident/Finance. What you charge in Progident/Clinic is automatically recorded in Progident/Finance.

As a complement to the time tracking report ("Punch") of Progident/Clinic, you can autonomously manage your payroll.

If you wish to monitor the complete financial situation of your clinic, Progident/Finance is the perfect addition.

This accounting software includes all the usual accounting features: financial statements, suppliers management with EDI payment and more.
